

Earn Trust and Safely Drive Value from Your Data

Privacy Analytics provides anonymization solutions to help pharmaceutical companies earn trust and safely drive value from sensitive data. Our team of experts are recognized by technology analysts and clients as pioneers in the development of methodologies, software and services that enable safe use of personal data and protected health information.

Get the most up-to-date, internationally recognized approach to anonymization:

- Safely fuel drug innovation and differentiation
- Share compliant clinical trial data sets – quickly, affordably and at scale
- Boost brand image while driving greater advances in patient health

8 of the top 10 global pharma companies listed on PharmExec's Top 50 served by Privacy Analytics

More than half the healthcare companies on the Fortune 500 swear by Privacy Analytics

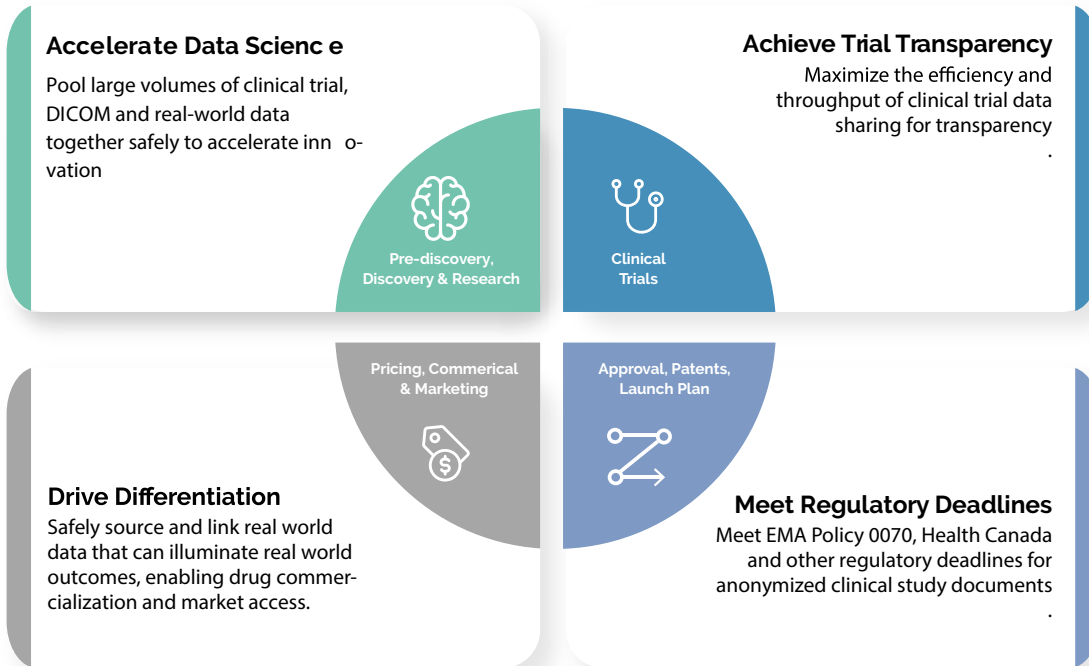

Thousands of datasets assessed over 12+ years in business

With Privacy Analytics, you get:

- **Risk measurement with auditable proof**
 - Statistical measurement to prove anonymization delivers sufficient privacy protection
 - Transparent reporting and audit logs with references to global standards and best practices
- **Richest possible data for the lowest risk**
 - Flexibility to preserve data utility while ensuring privacy protection
 - Demonstrated protection, with methods shown to withstand commissioned privacy attacks
- **100+ Data Privacy Experts**
 - Guidance from world experts who have informed global standards and regulations
 - Advisory Services, including help with data sharing policies, strategies & programs

Driving Value Across the Drug Development Life Cycle

Whether you're looking to comply with drug authorization regulations, share insight-rich data with health researchers, or scale anonymization for internal data strategies and drug development, we offer solutions to empower you across the drug development lifecycle.

Services and Software to Support Your Business Goals

Anonymization as a Service

Get efficient, reliable services to anonymize your documents and data. You'll drive data value while meeting regulatory requirements within deadlines.

Eclipse Trials Software

Automate the anonymization of structured individual patient data by integrating Eclipse Trials in your own IT or cloud environment.

Contact Privacy Analytics to set up your free, strategic consultation.

Together we'll discuss your business needs in order to help you safely drive value from data.
